

WEB INNOVATION CHALLENGE

INTRODUCTION

The event involves designing of a website, for a Organization / Company / Industry which dedicated towards generating a social and technical Impact on a particular section of the society in any aspect. The organization wants to have a professional attire and boost its outreach by developing their website. You have to work as a web designer / developer to build this website.

STATEMENT

- ❖ You have to design a single or multiple page website for any real or fictional organization that creates a huge social and technical impact .
- ❖ The organization for which the website is to be designed should have a highly innovative and creative idea of how it will practically help a group of people or a particular section of the society.It could be like making a sharing portal, or a website for an organization which helps deaf people learn through actions etc.(**NO IDEA SHOULD BE PICKED FROM ABOVE TWO**)
- ❖ Website can be designed using any markup language, with extension of CSS, Javascript and bootstrap.
- ❖ Site can be static as well as dynamic (involving top level navigation system i.e. active rollovers, section scrolling etc.)
- ❖ It should work properly for both Desktop and mobile devices mode including a responsive framework.
- ❖ Website should include at least 5 web pages / sections, which can involve (but should not be limited to):
 - ☐ Tagline/ Identity/ recent events/ notice board etc..
 - ☐ About Us section that incorporates about the organization and its mission and motto.
 - ☐ Contact / Donate Section (if any)
 - ☐ Media gallery

- ❑ Feeds and links to other webpages or social platforms (It shouldn't necessarily have any page on a social site).
- ❖ Site should be easily administered and should clearly depict the impact, the organization is making on the world.
- ❖ Website can be developed on any content management platform and can be hosted on any free-tier(AWS, Google cloud platform, etc.) or purchased server(GoDaddy, Bigrock, bluehost, etc) as per as your feasibility.
- ❖ Site should not include any pre built or purchased template/ theme. However, non copyright images and icons can be used for creativity.

STRUCTURE

The event will be organized in two stages as follows:

Stage1:

This involves submission of a detailed plan for building the site which should include:

- Type Of organisation for which this site can be used.
- Details of how your organisation is tackling this problem.
- Detailed structure of your webpage (different pages/section that will be present)
- What is new/different about your webpage?

Stage2:

- It involves the final submission of the proposed solution and designed web page through email.

- ❖ **FOR SUBMITTING THE SOLUTION EMAIL THE LINK OF HOSTED WEBSITE AND COMPLETE CODE & OTHER FILES IN ZIP FORMAT TO :**

anwasha.technical@gmail.com

- ★ Judgement will be strictly on the basis of
- level of innovation
 - stability of the webpage in different platforms
 - UI components
 - User Experience (Ease of Use, Waiting time etc)
